

## FEATURES TO ADD ON

1. Vehicle owners can also notify users if their vehicle is stolen by submitting their name and the vehicle number using this particular feature on the app called Report Stolen Vehicle (RSV) and it will appear as stolen vehicle notification to the users.  
If the vehicle is located by any user upon receiving full vehicle details from the app they can then contact the owner regarding their whereabouts or they can make a report to MVIL and a message alert or a notification can be sent to the owner instantly . The police can act on this information on the app

\*This is feature number 11 of the contract agreement .Please refer to it.

2. Please see if you could integrate 2 to 3 departments together with MVIL so they could have access to the information as well like the police department because they are the ones who are going to use it to make arrests randomly upon receiving the report.
3. All report sent to MVIL should have an alert or a copy be sent to the owner instantly.
